PROFESSIONAL EXPERIENCE

Food Delivery Driver

DoorDash, Central New Jersey, NJ

April 2021 - Present

- Ensure on-time delivery of food, beverages, and goods in excellent condition to 20+ customers per day
- Communicate with customers via app, text, and phone call to deliver updates on ETA and other delivery information
- Provide exceptional customer service through professional and timely conduct and communication
- Assess quality and completion of orders upon pick-up from restaurant or vendor before delivery
- Utilize GPS apps to optimize delivery routes, minimize delays, and meet ETAs for orders

Assistant Supervisor

2M Mechanical LLC, New York City, NY

June 2021 - August 2021

- Supplemented daily operations by assisting construction crews to prevent delays
- Provided workers with the necessary equipment and materials required to complete projects in an appropriate and timely manner
- Visited job sites regularly to ensure that all safety protocols were being followed and that all Personal Protective Equipment (PPE) was being worn by employees

PERSONAL PROJECTS

Portfolio Webpage (

- This webpage utilizes HTML, CSS, JavaScript, and GitHub to display my resume and contact information, along with my other projects, links to use them live, and pages to view their source code. It uses a contact form run by an external API.

Java Chatroom

- This is a global chatroom that accommodates multiple participants, facilitating conversations and offering interactive elements. Users are prompted to provide their names before engaging in real-time communication. The platform boasts rich features, including private messaging, the ability to create and join new rooms, and the option to mute or unmute users.

Calculator Application

- This calculator application has been developed using HTML, CSS, and Javascript, encompassing a range of functionalities that allow users to perform basic calculations akin to those performed on a traditional calculator.

Web-Based Chatroom

- This web-based chatroom employs a comprehensive stack of technologies, including HTML, CSS, JavaScript, PHP, and SQL to enable users to send messages, which are stored in an SQL database. Messages are displayed chronologically, along with sender information.
